15 Things I want to focus on next project, or what I would do differently if I could do this project over again.

1. Keeping a better log of cleaning in sheets (I.E formulas, dropped columns, etc).

2. Get better with Microsoft Power BI.

3. Spend more time doing data validation.

4. Make sure my data cleaning had no errors.

5. Use VLOOKUP.

6. Tried looking for more relatable data (I.E. using cpu dataset that is specific to laptop cpus).

7. Utilizing Microsoft Power BI to create the ERD.

8. Get more familiar with editing/updating within the database and utilizing git and github throughout the entire process instead of uploading updated files.

9. Write less queries that become irrelevant by the end of analysis.

10. Better results from cleaning.

11. Better storage of updated tables (I.E when a column is hidden in sheets due to it containing formulas drop it in the "Updated copy".

12. Write more complex Queries.

13. Design a website to host it.

14. Find a real world problem to solve.

15. Improve communication through the reports and presentation.
